

HYDRAULIC EXCAVATOR "PERSONAL" SIMULATION

"TURN YOUR PC
INTO A PROFESSIONAL TRAINING SIMULATOR!"

IT'S EASY!

This "Personal Simulator" puts you at the controls of a modern hydraulic excavator in a typical construction site. Begin by choosing the "SAE" or "Backhoe-Loader" joystick pattern, and then start your simulator-based work!

The simulation software *measures* how well you do in over fifteen different ways: execution time, bucket fill, stick angle, trenching precision, etc.

These simulation *results are automatically saved* for later review.

Simulations

12 simulation modules of increasing difficulty are provided, from the basics of boom and carrier operation to trenching and truck loading that features our unique "dynamic terrain modeling" technology.

Finally a **safe** and truly **cost-effective** way to help you:

- Select new trainees more *carefully!*
- Bring new operators up to speed *faster, more cheaply, and more safely!*
- Qualify new hires more *reliably!*

When you consider that even small accidents due to inexperience can cost thousands of dollars in replacement parts and downtime, this is a good value indeed!

The price?

- The software license is just \$4,000 (USD)
- This is a one time fee!
- See web site for joystick control options.
