SELF-STUDY COMPUTER BASED TRAINING (CBT) STANDARD & CUSTOM PROGRAMS AVAILABLE

- **FINAL EXAM WITH RECORDED TEST SCORES**
- **COURSE CERTIFICATE**
- **EASY TO USE**
- **CONSISTENT TRAINING**
- **“CHECK YOUR KNOWLEDGE” QUESTIONS**

These easy to use, computer driven, self-study programs introduce trainees to heavy equipment safety and operation concepts. Our specially designed format allows viewers to progress at their own pace while testing their understanding of the information as they go.

No need to purchase additional videos. The related full-length video(s) are imbedded into the CBT. Works on most computers. Typical length: 2-3 hours.

“CHECK YOUR KNOWLEDGE” questions (not scored) appear at the end of each lesson. If an incorrect response is given, the program links the student back to the correct answer. They may not advance forward to the next “CHECK YOUR KNOWLEDGE” question until they provide the correct response. This feature allows them to review the information as many times as needed until full comprehension of the material is achieved.

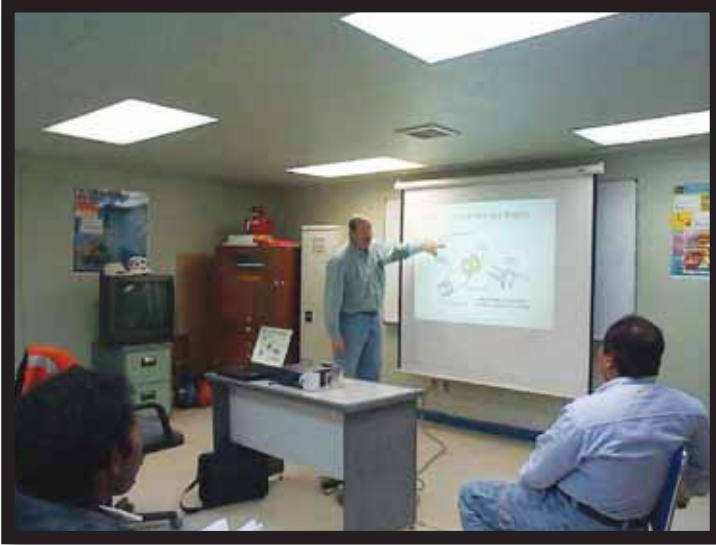

A scored “FINAL EXAM” is administered when all lessons have been studied and reviewed successfully. Scoring can be linked to a Learning Management System if desired. A “CERTIFICATE of COMPLETION” can be printed at the end of the program.

Sold as published, locked CBT that may require disc to be in the drive when running. License allows multiple users on a single PC. Simultaneous use and LAN versions available. Custom programs available on CD, DVD, or the WEB.

\$1,500 Per License- several titles available, FREE EVALUATION

EVERYTHING BUT THE INSTRUCTOR AND WE HAVE THEM TOO!

INSTRUCTOR KITS

- OVER 18 DIFFERENT KITS NOW AVAILABLE!
- INCLUDE EVERYTHING NEEDED TO CONDUCT A PROFESSIONAL TRAINING PROGRAM.
- LEAD YOUR TEAM TO BE SAFE AND MORE PRODUCTIVE.

KITS MAKE THE TRAINING PROCESS EASIER!

DESIGNED TO PROVIDE ABOUT 4-8 HOURS
OF CLASSROOM INSTRUCTION.

COST EFFECTIVE EQUIPMENT SIMULATORS

Simulation puts trainees at the controls without the risk!

Completely safe, always available, and very cost effective.

Just set up the simulator controls and install the simulation software. Most any desk or laptop PC will do.

Next, simply add a projector or a big screen display for “mine size” graphics combined with quality speakers.

SIMULATORS NOW AVAILABLE: “QUARRY” TRUCK / EXCAVATOR / CRANE
STARTING AT \$3,000 (US) - “FREE EVALUATION” SEE OUR WEBSITE
