

## TIRE CARE

### A HAUL TRUCK TRAINING SOLUTION

#### COMPUTER BASED TRAINING PROGRAM

Haul truck tires are not only a costly item, they are also in short supply. So getting 10,000 hours of service instead of 5,000 hours really pays off. Not only does it save in the repair and replacement of tires, it also allows the truck to continue to do its job without down time due to tire failure. The focus of this program is to emphasize that tire care is everyone's responsibility and taking simple precautions will add life to your tires.

Use this training tool to educate your truck and support equipment operators, supervisors, engineers and the rest of the crew in the importance of taking responsibility for tire care.

## The topics presented cover the following:

- Global tire supply crisis.
- Cause of tire failure.
- Hazards that shorten tire life.
- What truck operators can do to help.
- What shovel operators can do to help.
- What maintenance personnel can do to help.
- What support equipment operators can do to help.
- What supervisors and management can do to help.
