

## Mine Equipment Benchmarking and Targeted Training

Since 1999, Peak Performance Global has been a leader in:

- Benchmarking
- Targeted training
- Machine operational data

Project experience includes North America, South America, Africa, India as well as Australia.

Using our proprietary AC-3 Benchmarking Software, we have compiled specific operational data from over 127 mines, hundreds of machines and thousands of operators. This enables us to help you develop and implement mine industry best practices.

It's been proven that benchmarking, followed by targeted training is one of the most cost-effective methods of:

- Increasing productivity
- reducing maintenance
- minimizing overall operating costs

We have teamed with VISTA Training to provide the highest level of benchmarking and targeted training services to mines worldwide. Contact us to today at [ppg@vista-training.com](mailto:ppg@vista-training.com)
