

JURNEE™ INSTRUCTOR KITS HELP YOU TRAIN YOUR EQUIPMENT OPERATORS

VISTA Training, Inc. has released a series of new equipment operator instructor kits addressing construction equipment operator training, skills development, attitude and safety. These kits pay for themselves by helping to lower equipment damage, repair costs, and minimize time spent in the field covering introductory information on individual basis.

Jurnee™ by VISTA instructor kits help trainers' deliver consistent training to operators of construction and mining equipment. These training tool kits include "everything but the instructor".

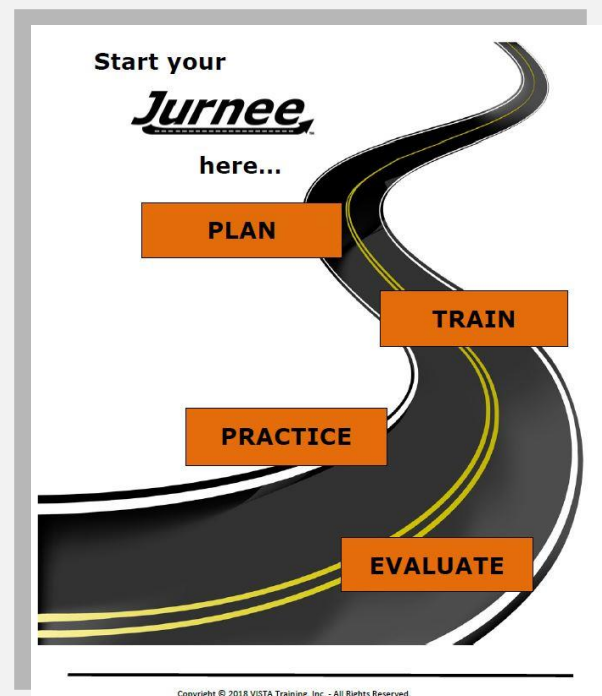

Each new instructor kit provides:

- *Unlimited use and printing via 24/7 login access from any computer*
- *2 - 4 hours of presentation screens*
- *Trainer and student guides - print any quantity, anytime*
- *Operator evaluation forms and guidelines on how to use*
- *Operator exam test - online and / or printable*
- *Course completion certificate template*
- *Over 25 printable documents in all*

Each annual license (one per trainer) provides login access from any computer (plus up to 10 employee online self-study accounts).

Training is not a destination.

It's a Jurnee™

Benefits of Jurnee™ by VISTA Instructor Kits

- Raises the level of professionalism of your equipment operator training program.
- Saves time - why develop training programs from scratch.
- Provides your operators with structured, more consistent safety training.
- Helps create a basis for required OSHA training records.
- Includes projectable and printable training materials - available anytime, anywhere.
- Pays for itself by helping to lower maintenance costs.

VISTA Training, Inc. produces safety and skills training materials for the construction and surface mining industries. Visit our website for all your equipment training needs.
